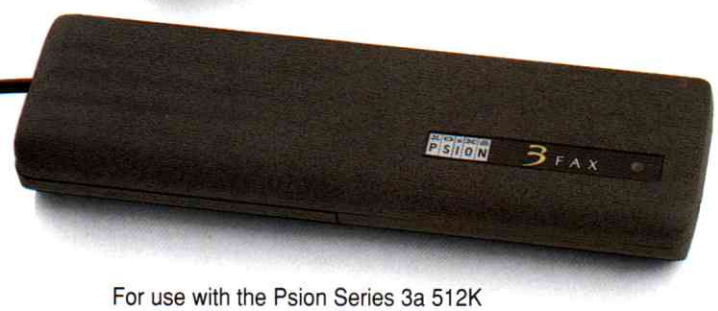
PSION 3FAX

Your own personal fax machine for use at home, work and away.



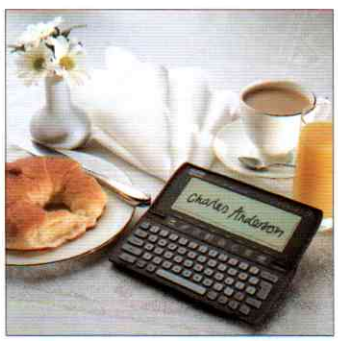
For use with the Psion Series 3a 512K

Prepare and send faxes, anywhere, anytime

Now, wherever you are and whatever the time, you can prepare important messages and documents, professionally format them complete with cover sheet, company logos and signature ... and then fax them from the nearest phone. No hassle. No paper work. No need for mains power. With the pocket Psion 3Fax you have the perfect partner for the Psion Series 3a (512K model only).

Big fax capabilities

Psion 3Fax gives you facilities you'd expect from desk-bound machines (and some you don't expect) ... on hand when you need them. It will queue faxes, defer them for sending at a different time to take advantage of lower call charges, automatically re-dial engaged numbers, and keep a record of faxes you have prepared and sent. The big difference is 3Fax slips in the pocket to go where you go. So it's always handy.



Everything you need - on hand

Psion 3Fax comes complete with leads, ready to plug into your Series 3a and use.

It has a built in text editor for creating faxes and your own cover sheet design. However, you can also create faxes directly from any Psion Series 3a application that can print-out - such as the word processor - and send them with or without a cover sheet. So faxing a spreadsheet or a week from your diary couldn't be easier. What's more, you can carry on using your Series 3a whilst a fax is being sent or waiting to go. Kicking your heels waiting for a fax machine to do its job is tedious, unproductive and with 3Fax, unnecessary.

Use 3Fax as a modem

Psion 3Fax also gives you access to Email and on-line information services - in fact, we give you free introductory membership to Compuserve, one of the world's largest networks, to get you started. And we've built in the software to help you automate the process of going 'on-line'.

Your company logo and signature

Incorporating a company logo and a signature into your faxes and cover sheets couldn't be easier - simply send examples to us and, for a nominal charge, we will convert them for you into 'picture files' ready for immediate use (Six pictures and three cover sheet designs are supplied with 3Fax).

The office in your pocket

With 3Fax and the Series 3a, you virtually have all the office equipment you need - on hand. Wherever you are, you can produce professionally formatted letters and documents, prepare spreadsheets for figure analysis, maintain comprehensive databases, have all your appointments and meetings properly organised. And communicate your information to anyone, anywhere by fax or modem. Small wonder the Psion Series 3a is the world's biggest selling palmtop.
